Rotterdam, January 27<sup>th</sup> 2023

To whom it may concern:

It is with great pleasure that I am recommending Sadra Shameli to you, as a more than capable software developer and hardware designer. I am CEO of Blue Star Planning B.V. and have worked with Sadra in our start-up since January 2022, where he has helped shaping hardware sensor device prototypes for the company (hardware design, 3d design and printing, c++ and c# development), as well as API and website development.

Sadra has a quick understanding of problems and an analytical mindset to come up with solutions. This lead to quick proposals for hardware design and eventual development and documentation.

Sadra can 3d design, 3d print and build and solder hardware independently. He knows his way around several coding editors, development environments, documentation and project management systems.

Sadra is a dedicated colleague, working remotely or in the office. He was always available for quick actions, alterations and support for the company whenever needed.

I believe Sadra is a perfect fit to any company and team, where out of the box thinking is needed and where the job 'just needs to be done'. Sadra's promise was, when joining Blue Star Planning, to pick up any challenge we would have. That he has perfectly proven in his time with Blue Star Planning. If you have any further questions, feel free to contact me at [jorrit@bluestarplanning.com](mailto:jorrit@bluestarplanning.com) or by mobile +31646218070 and I'll be happy to answer any questions you have.

Sincerely,

Jorrit Reedijk  
CEO Blue Star Planning
